LITTLEFORD LANDSCAPE NURSERIES

Main Nurseries and Office
HINSDALE, ILLINOIS

South Madison Street Road
Between Plainfield and Joliet Roads

Branch; Vincennes, Indiana

PRICE LIST NO. 78

We invite those contemplating the purchase of trees and shrubs to visit our grounds and see with what care we grow our stock. We give our stock the best fertilizing, pruning, cultivation, transplanting, etc. This puts vigor into the plants and makes them the most satisfactory stock for your needs.

Hinsdale is a suburb of Chicago in the heart of the metropolitan area. It is 17 miles from the loop on the Chicago, Burlington and Quincy Railroad, with frequent train service from the Union depot.

Hinsdale is easily reached by auto, it lies just south of the Ogden Ave. paved road (State Route No. 18), the main highway between Chicago and Aurora.

The Nurseries are situated on the Madison St. road $2\frac{1}{2}$ miles south of Hinsdale and only half a mile north of the Joliet paved road, (State Highway No. 4.)

We carry a general line of Shade, Fruit, Evergreen and Ornamental Trees, Shrubs and Vines that our observation and experience has shown are hardy and adapted to this climate.

Prices listed herein include the packing and delivery to express or railroad company.

PLANTING SERVICE

So far as possible on orders amounting to \$25.00 or more, we will for a moderate additional charge, plant the stock (if suitable soil and drainage conditions are provided), and furnish a written guarantee to replace stock that dies during the first growing season. A copy of guarantee will be gladly furnished on application.

LANDSCAPE WORK

Refer to Pages 12 and 13.

TERMS AND CONDITIONS OF SALE

TERMS: Cash with order, or on large orders we will ship if one-fourth cash is remitted with order, balance to be paid on arrival. On landscape or planting contracts of sufficient size, if desired, we will extend terms, which are a matter of agreement at time of ordering.

SPECIAL QUOTATIONS-ESTIMATES:

We make special prices on large orders. Write for estimate; give list of requirements, varieties, sizes, etc.

NON-WARRANTY: In the event that any nursery stock sold by us should prove untrue to name under which it is sold, we hereby agree to replace that portion of the order proven untrue to name, or refund the purchase price thereof. Except for such liability, and in respect to all nursery stock sold by us, we give no warranty, expressed or implied, as to description, quality, growth, productiveness, or any other matter.

NURSERY INSPECTED

Our nurseries are inspected once each year by an accredited representative of the State Department of Agriculture to see that no dangerous insects or plant diseases become established; a copy of the Department's Certificate of Inspection is attached to each shipment.

LARGE TREES

We have large trees especially in the American Elm to give immediate results. These are moved in the winter time. We are fully equipped for this work. Prices on application.

2 in. dia. 6.00

2½ in. dia. 8.00

MALUS—The Flowering Crabs

The Flowering Crabs are among the most beautiful of our flowering trees and shrubs. Their blooming is one of the most beautiful and interesting events in the spring succession of flowers and at the Arnold Arboretum, judging by the attendance of the public, they are second to none in popularity. They have been collected from various parts of the world. Some are double flowering, some single and some bearing interesting fruit and all are individual and interesting in outline. They are hardy and will grow anywhere that the apple will do well.

This season we are offering the following varieties, we are propagating additional varieties and will offer them in the near future.

2-3 ft.	\$1.00
3-4 ft.	1.50
4-5 ft.	2.00
5-6 ft.	3.50

M. Arnoldiana—Arnold Crab

A beautiful variety, originated at the Arnold Arboretum.

3-4 ft. 5-6 ft.

M. Atrosanguinea—Carmine Crab

Brilliant Carmine flowers, 4-5 ft.

M. Floribunda—Japanese Flowering Crab

Handsome pink buds, opening white.

Small, yellowish fruit much liked by birds.

3-4 ft.

M. Ioensis—Prairie Crab

Our native crab, beautiful pink flowers and delicious fragrance.

3-4 ft.

M. Ioensis Plena—Bechtel Crab

Many consider this the most beautiful flowering tree adapted to the Northern states. Produces abundantly of beautiful pink flowers making a veritable tree of roses. A wonderful combination of sturdiness, hardiness, delicacy of coloring, twig outline, and most pleasing fragrance that fills the very air when in bloom.

3-4 ft.; 4-5 ft.

M. Niedzwetzkyana—Redvein Crab

An early Asiatic species producing single red flowers followed by red fruits.

2-3 ft.; 3-4 ft.

M. Prunifolia Rinki—Chinese Apple

Large white flowers, and red, yellow, or green fruit 1½ in diameter.

3-4 ft.; 4-5 ft.; 5-6 ft.

M. Robusta—Cherry Crab

Early. Large white, fragrant blossoms; Dull red fruit.

3-4 ft.; 5-6 ft.

M. Sargenti—Sargent Crab

A remarkable dwarf spreading Japanese variety; White flowers with bright yellow anthers; Scarlet fruit hangs all winter.

2-3 ft.; 3-4 ft.

M. Sieboldi—Calocarpa

"One of the handsomest crabs in the Arnold Arboretum." Large pink and white flowers, brilliant scarlet fruit, half inch in diameter.

3-4 ft.

M. Zumi-Zumi Crab—Pink and white flowers, bright scarlet fruit.

4-5 ft.

SHRUBS

The stock offered is well grown, transplanted stock, grown especially for a discriminating landscape clientele. We could raise twice as many shrubs per acre by close planting and therefore at one-half our present cost, but it would not produce the robust, well-rooted plants that we offer.

ACANTHOPANAX

	each	Per Ten
A. Pentaphyllum—Aralia Pentaphylla		
2-3 ft.60	\$ 5.50
3-4 ft.75	7.00

Landscape Gardening

It is with pleasure we call your attention to this department. We believe that almost everyone has a deep appreciation of that which is beautiful in nature, but usually have not the training to compose, as they would like. This work of laying out of ground is often entrusted to the gardener who understands the details, but, generally, lacks in his knowledge of the composition, its underlying principles. He does not appreciate the demand of unity, variety, character, propriety and finish.

The grounds should, generally speaking, form a framework or setting for the house, harmonizing with its architectural features.

Many people carry the impression that "landscape work" is only for the wealthy, but this is not so. One hundred dollars, or more, expended on a 50-100 foot lot often increases the value of the property to double and triple the amount of the expenditures, and is surely a source of great satisfaction to the owner.

We are prepared to do work of this kind from the modest city lot to the large country estate. Sometimes, for convenience, the work extends over several seasons, each planting being done with regard to the unity of the ultimate composition.

We will be pleased to consult with you regarding this or any other branch of our business.

2-3 ft.70	6.00
3-4 ft.80	7.00

NAMED LILACS

Our Lilacs are grafted on privet, not budded. Lilacs budded on privet are inferior. When grafted properly on privet, the Lilac soon develops its own root system and the privet root dies off leaving the plants entirely on their own roots.

Charles X—Single, purplish red

2-3 ft. 1.25

Ludwig Spaeth—Single, deep red, the best of the red Lilacs

3-4 ft. 2.00
